SUMMARY

Frontend developer with commercial and freelance experience building responsive, component-based applications in **React** and **JavaScript/TypeScript**. Have shipped full production websites and a multi-page event platform from design to deployment — reusable UI, REST API integration, authentication and interactive features. Quick to onboard into an existing codebase and start contributing with a team in a short time

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python

Frontend: React, Next.js, Hooks, React Router, Responsive design, Bootstrap

Backend & Data: Node.js, REST APIs, PostgreSQL

Tools & Other: Git / GitHub, JIRA, Agile / Scrum, Unity (3D / mobile)

KEY PROJECTS

Mijocarum.am — Event Management Platform (mijocarum.am)

- Built a multi-page web platform for organising events, with user authentication, guest-list management and RSVP tracking.
- Developed an **interactive seating-plan editor** and event schedule manager as reusable React components.
- Implemented a responsive, mobile-friendly UI and multi-language support (Armenian / Russian).

Armenian Truck Service — Corporate Website (armtruck.am)

- Designed and built a multi-page corporate site in **Next.js** with dedicated service pages, contact forms and embedded maps.
- Delivered full multi-language support (Armenian / Russian / English) with optimised images and SEO-friendly markup.

Statue Collector — Mobile App with 3D Models

- Created a mobile application for collecting statues, featuring interactive **3D models** built in Unity.
- Built the catalogue UI and the interactive 3D viewing experience; targeting Android and iOS (currently in development).

WORK EXPERIENCE

Frontend Developer (Freelance) | Self-employed · Remote

11/2023 – Present

- Build and deliver responsive, multi-page websites and web apps in React / Next.js for clients, from requirements to deployment (see Key Projects).
- Integrate front-ends with REST APIs and implement authentication, state management and form validation.
- Work directly with clients and small teams, onboarding into existing code quickly and shipping features on schedule.

Systems Engineer | Tinkoff Bank

04/2023 – 10/2023

- Troubleshoot and resolved server issues on Ubuntu Linux, keeping internal services running reliably with minimal downtime.
- Maintained operator workstations across the office so staff could work without interruptions.

Frontend Developer Intern | Hadros

11/2022 – 02/2023

- Built small React applications from scratch, including authentication flows and routing.
- Consumed REST APIs through an auto-generated TypeScript client, keeping types in sync with the backend.
- Worked in a Git-based team workflow with code reviews and pull requests.

System Administrator | InRetail LLC

04/2018 – 10/2020

- Maintained and configured computer systems, network servers and virtualization, ensuring reliable day-to-day operation.

EDUCATION & TRAINING

Full-Stack Web Development — Elbrus Bootcamp

01/2022 – 06/2022 · Moscow

System Administration — Yerevan State College of Informatics (YSCI)

2012 – 2018

Python (Intermediate) — Profound Academy — ongoing

2024 – Present

LANGUAGES

Armenian — Native

Russian — Full Professional

English — Professional Working
